

VJAS December 2020 Mini Sponsor's Update

Greetings VJAS Sponsors and Supporters! I had to pass these three items along to you with greetings of the season!

1. "THE GREAT CONJUNCTION"

If the night of December 21 is clear of clouds, step out and fix your gaze on the southwest horizon just after sunset and before 7:00 p.m. Saturn and Jupiter will appear to align and glow as a single bright spot. If you have a telescope you may be able to see the rings of Saturn.

This heavenly phenomenon is known as The Great Conjunction has not taken place since 1623 and won't be seen again until 2080.

2. Link to the VAST Journal which has an article that promotes VJAS.

3. VJAS VOICE

Finally, December 15 marked the day that individual students could join VJAS, school membership is still open for schools. After January 17, there will be an additional charge for membership. Thank you to the schools who have already completed membership!
